

IN THE CLAIMS:

Please replace claims 1, 3, 5 and 15 as follows:

25 1. (Amended) A method for manufacturing an image displaying medium comprising:

first, providing plural colorant particles on at least one of a first flat substrate and a side of a second substrate on which a spacer is provided to maintain a distance to the first substrate upon superimposing on the first substrate; and

second, fixing the first substrate and the spacer on the second substrate to arrange the colorant particles between the first substrate and the second substrate.

26 3. (Amended) A method for manufacturing an image displaying medium comprising:

first, providing plural colorant particles on one or both of a first flat substrate and a second flat substrate and providing a spacer member on one of the first substrate and the second substrate; and

second, arranging the colorant particles and the spacer member between the first substrate and the second substrate by fixing the spacer member, the first substrate and the second substrate.

27 5. (Amended) A method for manufacturing an image displaying medium comprising:

first, providing plural colorant particles on one or both of a first flat substrate and a second flat substrate while masking one of the first substrate and the second substrate;

second, after removing the mask, providing a spacer member on one of the first substrate and the second substrate; and

third, fixing the spacer member, the first substrate and the second substrate so that the colorant particles and the spacer member are arranged between the first substrate and the second substrate.
